01 | Company Introduction

RevComm Inc. is one of the fastest growing startups in Japan. Our mission is to reinvent communication to create a society that cares for one another. We were founded in 2017 with the business domain AI × Voice × Cloud software & IP-Phone. From here we gave birth to RevComm, a telephone system equipped with artificial intelligence that is able to minimize differences in team performance, to increase sales conversions, while reducing communication training costs. Similarly, we have also introduced RevComm Meetings for online, and RevComm RecPod α for offline meetings in the following years. In 2023, Forbes, Sequoia Capital, and Meritech Capital endorsed RevComm as a 2023 Top 50 AI company.

02 | Products Details

RevComm is AI-powered analytics that provides real-time insights into your team's calls, video meetings, and offline meetings. This enables you to make data driven decisions to increase sales and improve customer satisfaction scores.
